

SHREE RBSK AUTOMATION

USER GUIDE

Version

1.0.0

Introduction

Thank you for using SHREE RBSK Automation.

This extension automates Student Registration and Child Screening entry in the RBSK Portal.

Supported Browsers:

- Google Chrome
- Microsoft Edge

Features

- Student Entry Automation
- Child Screening Automation
- Resume Automation
- Pause Automation
- Stop Automation
- Progress Dashboard
- Failed Student Export
- Excel Import

Installation

1. Download the Extension.
2. Open Extensions.
3. Enable Developer Mode.
4. Click Load Unpacked.
5. Select Extension Folder.
6. Login.

Student Entry

1. Download Student Entry Template.
2. Fill all columns.
3. Save Excel.
4. Upload Excel.
5. Select Student Entry.
6. Click Start.

Child Screening

1. Download Screening Template.
2. Fill required fields.

3. Upload Excel.
4. Select Child Screening.
5. Click Start.

The extension fills the initial screening fields. Complete the remaining screening manually. When the page returns to **+ Add New Child**, the next student starts automatically.

Excel Rules

- Do not change column names.
- Do not remove the header row.
- One Row = One Student.
- Save as .xlsx

Vision Field

If Excel converts **6/6** into a date, format the Vision columns as **Text** before entering values.

Supported Values

Gender: Male, Female, Other

Troubleshooting

Excel Not Loading - Check .xlsx format.

Automation Not Starting - Login again.

Wrong Data - Verify Excel.

Automation Stops - Click Resume.
